EDUCATION
Prommeo Tech Software Engineering Program -
February 2022- March-2023
I Learned JavaScript, ES6 ,Object oriented Programming, Design Patterns, Unit Testing, HTML5, CSS, Bootstrap, JQuery, AJAX, Responsive Web Design, Rest Api Consumption, ReactJS ,JSX, NPM and Axios .

Experience

Projects

Mern Login Registration Form |*Node.Js**, React,Vite, Express.js, MongoDB ,JWT*
  - Created a Login Registration Page Using MERN Stack
  - Secured user Passwords by Using Bcrypt and tracked Users actions with JSON webtokens
  -Employed React hot toast Package to show notifications
 - Managed Data with MongoDB for CRUD Operations and ensured user
   authentication with Node.js and Express.js

React Movie Review App | *React, Axios*
 - I Implemented a Movie API integration employing the Axios library and utilizing the useEffect hook to retrieve and manage movie data.
- Users are provided with the option to append a written text review for each movie, which subsequently appears beneath their favorite film selection.
-Users also have the ability to toggle the visibility of these reviews, choosing to display or hide them as desired.

React Employee Management App | *React.js , React Ui , Axios*
 - Created Using React This application enables employers to perform essential personnel management tasks, such as creating, updating, and deleting employee names and the job titles on an external API.
- The implementation utilizes the Axios Library to handle the necessary HTTP requests. Additionally, the UseNavigate hook is employed to streamline the process.
- When the employer submits new employee data through the form, the application automatically navigates to the Read page, where the newly submitted data is displayed comprehensively.

Technical Skills

Languages : Javascript ,Html,Css
Frameworks: React.js , Bootstrap
Database : Mongo DB
Technologies : Git, Github
